

Allcool

London Ltd

**INDUSTRIAL
RADIATORS**

Nationwide coverage.

- **Allcool manufacture new radiators to pattern for onsite installation.**

- **Allcool recore existing radiators onsite in front of engines.**

Inspection

Allcool respond to enquiries promptly.

We take our team of experts nationwide to carry out site surveys, pressure tests or repairs on generator radiators, oil coolers and charge air coolers.

Our experienced team will identify all problems and faults, communicating with the clients accordingly.

Onsite

At Allcool we know that it is imperative to keep our clients downtime to an absolute minimum.

We will carry out replacement of radiator or recore radiator onsite in front of the engine and minimise downtime with our rapid response team. We can operate in restricted conditions and fabricate access panels in containerised units where safe access is restricted.

Our highly trained team is accustomed to working efficiently in tight and cramped conditions.

Satisfaction

Our entire service is dedicated to responsiveness and solving our customers' problems to the highest possible standard.

Our extensive data library enables us to alter or improve the cooling performance for all generator engines using conventional type radiators or remote cooling.

All damaged and worn components are replaced.

“ Our high quality cores offer significant improvements in performance. ”

We always leave your site clean, tidy and ready for service.

Allcool manufacture and work to ISO 9001:8000 standards.
